Reasons For Allowance

The following is an examiner's statement of reasons for allowance: Prior art of the record disclose a current sense bias circuit for use with MR head comprising: a first and second transistors; a bias source connected between the base of the first and second transistors; a first and second resistors connected to the collector of the first and second transistors respectively; a first and second current source connected to the emitter of the first and the second transistors respectively. However, prior art of the record fails to further disclose that the quiescent bias current through the MR head equals the difference between the first current and the second current; and the emitter current in of the first emitter equals the first current plus the current through the MR head, and the emitter current of the second emitter equals the second current minus the current through the MR head; wherein when the current through the MR head varies from the quiescent bias current through the MR head, such current variation appears in the first and second emitter current and results in a variation in the voltages at the first and the second collectors and resistors as claimed. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
